

## 2023 Predicted Apple Harvest Dates – Southwest Michigan Region

Bill Shane, MSU Extension

The information below includes predicted dates for peak harvest. Actual harvest dates may begin before and extend after these dates, and it is likely to vary based on specific location and conditions. This information is intended to be used by commercial growers to start planning harvest management. Interpretation is necessary for marketing purposes and fruit may be available in retail locations at different times.

The predicted harvest dates for all [Michigan State University Enviroweather Stations](#) are now available online and can be determined using the [Apple Maturity Model on the Enviroweather Website](#). These models for McIntosh, Jonathan, and Red Delicious calculate predict harvest dates based on full bloom date and the temperatures in the 30 days after bloom.

Most varieties are predicted to harvest one to several days earlier than normal. Harvest dates may need to be adjusted as we get closer to harvest.

**Crop load** is very good in most locations. In general, return bloom was good in most varieties and most locations. Gala crop load is moderate to heavy across the region. Honeycrisp crop load is somewhat variable across the state. Blocks with light croploads will mature 3 or 4 days sooner than the predicted harvest dates while heavy crop loads will mature 7 days later than the predicted dates.

**Conditions during August and September** will also affect harvest dates. If hot stressful weather occurs in August or September, apple maturity will be advanced, especially in early to mid-ripening cultivars.

**Stop-drop materials.** ReTain application should be applied 30 DBH (days before harvest). Harvista can be applied 3 to 7 DBH. Use Table 3, 2023 Predicted Harvest Dates for Other Varieties, to time ReTain applications and adjust for varieties and locations.

**The tables below** list the normal and predicted harvest dates for varieties across the state. Table 1 lists the predicted harvest dates for locations across the state of Michigan for 2023. Table 2 lists this year's predictions compared to normal and last year. Table 3 lists the normal harvest dates for other varieties for the Southwest Michigan area with focus on Berrien County. This year's predicted dates for other non-modeled varieties are an estimate based on the McIntosh, Jonathan, and Red Delicious predicted dates and historical experience in the area.

**Table 1. 2023 Full bloom dates and predicted peak harvest dates**

Station	Full bloom date 2023			Predicted harvest date 2023			Observer
	McIntosh	Jons	Reds	McIntosh	Jons	Reds	
SWMREC	4-May	5-May	7-May	4-Sep	18-Sep	27-Sep	Shane
Deerfield*	5-May	7-May	5-May	6-Sep	26-Sep	2-Oct	N/A*
Romeo*	11-May	12-May	13-May	11-Sep	2-Oct	10-Oct	N/A*
Sparta	7-May	8-May	8-May	7-Sep	27-Sep	3-Oct	Brown
Hart	13-May	15-May	16-May	13-Sep	7-Oct	12-Oct	Lavelly
NWMHRS	14-May	18-May	20-May	14-Sep	4-Oct	9-Oct	Rothwell

\*Dates indicated by model, not by actual observation.

**Table 2. 2023 predicted peak harvest dates compared to normal and last year.**

Station	Days +/- normal*				Days +/- last year*		
	McIntosh	Jons	Reds		McIntosh	Jons	Reds
SWMREC	-6	-4	-1		-4	-3	-2
Deerfield*	-4	5	-6		-1	3	3
Romeo*	-2	7	7		-2	5	6
Sparta	-9	1	-4		-5	-2	0
Hart*	-3	4	2		0	8	7
NWMHRS	-8	-2	-8		-3	1	0

\*Dates indicated by model, not by actual observation

\* - is earlier, + is later than normal

**Table 3. Normal and predicted 2023 peak harvest dates for varieties for the Southwest Michigan area**

Variety	Normal	Predicted
Paulared	22-Aug	16-Aug
Zestar	22-Aug	16-Aug
Gingergold	24-Aug	14-Aug
Gala	8-Sep	2-Sep
McIntosh	10-Sep	4-Sep
Honeycrisp	13-Sep	7-Sep
Empire	19-Sep	14-Sep
Jonathan	22-Sep	18-Sep
Jonagold	22-Sep	19-Sep
Fuji	25-Sep	23-Sep
Golden Delicious	25-Sep	24-Sep
Red Delicious	28-Sep	27-Sep
Idared	5-Oct	4-Oct
Rome	5-Oct	4-Oct
Braeburn	20-Oct	18-Oct
Goldrush	26-Oct	25-Oct

\*Dates in this table were determined from average observations by industry members in the region.
