

Listed below is a summary of upcoming Agricultural informational/educational events in our area. For a more complete list of events, you can go to Michigan State University Extension's Events Management webpage at <https://www.canr.msu.edu/outreach/events>

New Regulations for Pesticide Applicators

The Environmental Protection Agency (EPA) has developed an online system called Bulletins Live! Two that determines if additional pesticide use limitations are needed to protect listed endangered species or habitat based on the specific application site, pesticide product and application month. These changes represent a major shift in how agricultural and non-agricultural pesticide applicators meet regulatory compliance. There are agricultural use patterns in Michigan that are currently impacted by these new use limitations. Pesticides that require the use of the Bulletins Live! Two system will indicate so on the label under the environmental hazards section. If a pesticide label directs you to Bulletins Live! Two, you are required to follow the pesticide use limitations found on both the label and the bulletin generated by Bulletins Live! Two. You can check to see if your farm might be impacted by visiting [Bulletins Live! Two](#), entering the address and date of potential pesticide applications and leaving the EPA registration field blank. For more information on these changes, visit the [MSU Extension Bulletins Live! Two website](#).

As part of the ongoing efforts to improve pesticide safety education and certification processes, our MSU Extension Pesticide Safety Education group has developed a short survey to gather feedback from pesticide applicators. The survey focuses on how you prefer to recertify, access information, and overall experiences with the certification process. Your support and feedback is greatly appreciated.

The survey click link to the Google Doc is: [Survey for Pesticide Applicators](#)
