

**Graduate Student Fellowship Awards
Department of Fisheries and Wildlife
Michigan State University**

Applications due February 15, 2024

The Department of Fisheries and Wildlife (FW) is pleased to announce the annual competition for its graduate fellowships. We encourage graduate students to apply! Fellowship funds can be used in a variety of ways, such as funding travel to a workshop or conference, or covering basic life expenses. Receiving a fellowship and including that on your CV is also one way of demonstrating your accomplishments and career potential. These fellowships typically range from \$2,500 to \$5,000 awarded to each recipient (varies with the fellowship).

The Fellowships. The FW Department administers several graduate student fellowships. FW uses a common application process (described below) for the Ball Fisheries and Wildlife, Glassen Conservation Medicine, Maison, Tanner Fisheries Excellence, Peters, and Wallach Fellowships. A full description of each fellowship is available below. Note that the Wallach Fellowship is open to students from any MSU academic department. The other fellowships are open only to graduate students pursuing a degree in Fisheries and Wildlife. Applications will be reviewed by the Fisheries and Wildlife Department Graduate Committee.

Responsibilities of Fellowship Awardees. Fellowship funds for awards will be distributed at the beginning of the fall 2024 semester provided you are a registered student at MSU (except for the Wallach, which is distributed in spring). Fellowship recipients will be asked to provide a brief explanation for how the funds were allocated. In addition, recipients will be required to acknowledge/express thanks for their fellowship in a letter to respective donor families (with a copy to the Department) prior to release of fellowship money. Student recipients also must acknowledge financial support of 'the specific endowment (fellowship award) within the Fisheries and Wildlife Department at Michigan State University' when appropriate (e.g., research presentations, publications). Fellowship recipients are recognized at the Fisheries and Wildlife annual student awards event in spring.

The Application Process. We use a common application process to award the fellowships. Two Google Forms are involved in submitting a complete application. The information that each applicant provides on the Google Form: '[2024 Application Form for Graduate Fellowships Administered through the Fisheries and Wildlife Department](#)' will be used to determine eligibility of each applicant for each fellowship. Each applicant will be considered for the fellowships for which they are eligible. Applicants will also submit their CV and 1-page essay to this form. Applicants are also required to provide 2 reference letters, one of which is written by the applicant's advisor(s). Letter writers should be instructed to submit their letters to the Google Form: '[2024 FW-administered Graduate Fellowships. Form for submitting Letters of Support](#)'. Direct links for each of these Google Forms are provided below.

Application Deadline for All Materials: February 15, 2024

Fellowship Descriptions

Robert C. Ball and Betty A. Ball Fisheries and Wildlife Fellowship. The purpose of this award is to recognize a student(s) committed to the study of fisheries, limnology, or water quality and who are U.S. Citizens. Dr. Robert C. Ball was one of the first members of the faculty in the Department of Fisheries and Wildlife at Michigan State University. He is a well-known and respected limnologist. During his tenure, the limnology program within the Department of Fisheries and Wildlife was highly regarded nationally and he served as the advisor for many graduate students who became well-known limnologists. In addition to his faculty role, Dr. Ball also served as the Director of the Institute for Water Research. Two ~\$5,000 awards.

Hal and Jean Glassen Conservation Medicine Fellowship. The purpose of this award is to recognize a student committed to the study of Fish and Wildlife Disease Ecology and Conservation Medicine. Hal and Jean Glassen were avid hunters who believed in the scientific management of wildlife. Lifelong conservationists, they supported research and programs aimed at habitat improvement, sustainable harvest through controlled hunting, and understanding the carrying capacity of land for wildlife. This fellowship was established as a means of providing support to deserving graduate students enrolled in the Fish and Wildlife Disease Ecology and Conservation Medicine Specialization and pursuing graduate-level research related to the goals of this specialization. Student must be a graduate student who is or will be enrolled in the Fish and Wildlife Disease Ecology and Conservation Medicine Specialization pursuing a MS or PhD degree. Two ~\$4,000 awards.

The Joseph Laurence Maison Fellowship. The purpose of this award is to recognize a student who is committed to pursuing a career in wildlife conservation. Joe Maison, who was a Michigan outdoorsman and hunter all his life, through experience came to understand something of the lives of local wildlife. He had great respect for the state's animals, birds and fish and appreciated the idea of habitat conservation. Two ~\$2,500 awards.

Dr. Howard A. Tanner Fisheries Excellence Fellowship. The purpose of this award is to recognize a student who is committed to fisheries research related to the Great Lakes, connecting waterway or tributary stream research. Dr. Howard Tanner is an alumnus of the Department of Fisheries and Wildlife earning his Ph.D. under the direction of Dr. Robert Ball – a well-respected limnologist. In the mid-1960's, Dr. Tanner served as the Chief of the Fisheries Division of the Michigan Department of Natural Resources (MDNR) where he was heavily involved in the initial salmon stocking in the Great Lakes. From there, he served as the Director of Natural Resources for the College of Agriculture and Natural Resources at Michigan State University. One ~\$2,500 award.

John Peters and Marieta Peters Endowed Fellowship. The purpose of this award is to recognize a graduate student who seeks a career in aquatic biology related to fisheries and wetlands resources, an interest in the protection and management of aquatic habitats dealing with issues related to physical changes of channels, water quality, and the allocation of water resources. Dr. Peters professional career spanned 3 decades with Montana Department of Fish, Wildlife and Parks, Bureau of Reclamation, and Environmental Protection Agency. His work focused on the aquatic environment with particular interest in environmental protection of aquatic resources. Two ~ 2,500 awards.

The Vera M. Wallach Graduate Fellowship. This award is for Michigan State University graduate students studying wildlife management, wildlife ecology, or natural resource management, or conducting Arctic and Antarctic research, with emphasis on the protection and preservation of wildlife in those regions. Priority shall be given to students who are citizens or residents of Denmark, or the US, in that order. Funds for this award will be distributed during the spring semester after acknowledgment of award is received.
