## MSU Right to Know

Please fill out the following information and sign the bottom to verify that you watched the MSU Right to Know video (1996) distributed by the Office of Radiation, Chemical, and Biological Safety and understand its concepts.

If chemicals are mishandled or abused they can

- A. Cause life threatening diseases
- B. Contribute to the destruction of the environment
- C. Create catastrophic accidents
- D. All of the above

Fill in the blanks

Hazardous substances can be found in the form of dusts, gases, fumes, mists, and vapors; they can enter the body through

1. \_\_\_\_\_
2. Inhalation via the respiratory system
3. Ingestion through the digestive system
4. \_\_\_\_\_

In addition to identity of the substance, and the name of the manufacturer or importer, the container labels indicate the hazard warnings by rated diamonds, what does each diamond represent?

Red: \_\_\_\_\_ Yellow: \_\_\_\_\_

Blue: \_\_\_\_\_ White: \_\_\_\_\_

True or False: If a substance is toxic, even a low exposure will have a damaging effect. \_\_\_\_\_

When speaking in terms of flammability and combustibility, what is a chemical's flashpoint? \_\_\_\_\_

The Material Safety Data Sheets (MSDS) includes what information about the substance?

- |  |                       |
|--|-----------------------|
| 1. _____                                 | 5. _____              |
| 2. Hazardous Ingredients                 | 6. Health Hazard Data |
| 3. Physical and Chemical Characteristics | 7. _____              |
| 4. _____                                 | 8. _____              |

Which type of protective equipment are better, chemical goggles or safety glasses? Circle one.

Remember that you have a right to know about the substances you handle, if you have any questions don't hesitate to ask your supervisor or contact ORCBS at 355-0153.

I have seen and understand the MSU Right to Know video.
