Michigan 4-H Volunteer Webinar: Friendly but Firm: Boundaries That Make Volunteering Better

September 18, 2025 12:00PM - 1:00PM Zoom

September 18, 2025 7:00PM - 8:00PM Zoom

A webinar series that will provide Michigan 4-H volunteers with a variety of learning opportunities to help them grow as a volunteer and support the Michigan 4-Her's. This session is: Friendly but Firm: Boundaries That Make Volunteering Better. Volunteering should feel good—not overwhelming! In this session, we'll talk about how to set friendly (but firm!) boundaries with youth, families, and fellow volunteers. Learn how to say "yes" with intention, "no" without guilt, and keep your 4-H experience fun, respectful, and drama-free. Because great boundaries = great 4-H activities!

STATEWIDE 4-H NEWS

Safe food for 4-H events

Food safety is important when hosting food events or fundraisers. A new fact sheet, **Safe Food for 4-H Events**, was created to provide education and resources for 4-H staff, volunteers and youth who are coordinating and participating in 4-H food fundraisers or events. View the factsheet at www.canr.msu.edu/resources/safe-food-for-4-h-events.

In addition, MSU Extension held a training on food safety best practice guidelines for those who are planning for, preparing and implementing food fundraisers or events. 4-H families are encouraged to watch the training online at https://mediaspace.msu.edu/media/Safe+Food+for+4-H+Events/1_krsqfes3.

As 4-H families plan fundraisers and other activities throughout the year, remember to review these important resources as a reminder of food safety best practice recommendations.

Going home: Biosecurity tips for animals that travel off the farm

Adapted from: https://www.canr.msu.edu/news/biosecurity_tips_for_animals_that_went_to_the_county_fair.

Animals that are exhibited at the county fair, jackpot shows, and other exhibitions are likely near and dear to their exhibitor's hearts. Michigan State University Extension offers these biosecurity steps exhibitors can take to protect their show animals and those that were left at home once the event has ended.

- Keep animals that left home separate from animals that did not for a minimum of 14 days. If at all possible, do not allow nose-to-nose contact and provide as much distance between animals.
- Disinfect all buckets, feeders, tools and footwear that left home.
- Throw away any feed or hay that left home.
- Always wear clean clothes and footwear. Boot coverings may be helpful when caring for isolated animals.
- Take care of animals that stayed home from the show first, and animals that were at the show second. Do not go back and forth between animals as this increases the risk of cross-contamination.
- Do not eat or drink in the barn.
- Observe animals daily for signs and symptoms of illness, such as:
 - Obvious pain or discomfort
 - Decrease in appetite and water intake
 - Fever
 - Lethargy
 - Diarrhea or changes in consistency in manure
 - Discharge from nasal cavity or eyes
 - Overall weakness

Care of animals after traveling is just as critical as their pre-show care. Exhibited animals were exposed to new animal populations and fair-goers, and will typically experience a lot of stress during their time away from home. By practicing these biosecurity steps, you can help keep all of your animals safe and healthy.
