
Vegetable Crop Pest Management

**A Guide for Commercial Applicators
Category 1B**

Editor:

Rebecca L. Hines
Academic Specialist
Pesticide Education Program
Michigan State University

Acknowledgements

We would like to express our thanks for the advice and technical assistance of the following reviewers: Dr. Chris DiFonzo, MSU Pesticide Education Program; Dr. Ed Grafius, MSU Department of Entomology; Dr. Bernard Zandstra, MSU Department of Horticulture; Dr. Mary Hausbeck and Sheila Linderman, MSU Department of Plant Pathology; Fred Warner, MSU Diagnostic Services; Becca Thompson, MSU Integrated Pest Management Program, and Joe Strazalka, Michigan Department of Agriculture

Special thanks go to:

Dr. George Bird, Department of Entomology, Michigan State University for providing the images of plant parasitic nematodes.

Steve Demming and Dr. Dale Mutch, Kellogg Biological Station, Michigan State University for graphics on page 4, 12, and 59.

Dr. Ed Grafius, Department of Entomology, Michigan State University and Dr. Bill Hutchison, Department of Entomology, University of Minnesota, for providing the images of vegetable insect pests.

Dr. Mary Hausbeck, Sheila Linderman and Dr. Willie Kirk, Department of Plant Pathology, Michigan State University, for providing the images of vegetable diseases.

Fred Warner, Diagnostic Services, Michigan State University, for writing Chapter 8, *Nematode Management*.

Vegetable Crop Pest Management

INTRODUCTION	v	Precalibration Check of Nozzle Output	26
CHAPTER 1: INTEGRATED PEST MANAGEMENT		Spray Pattern Uniformity	26
Integrated Pest Management	1	Broadcast Sprayer Calibration	27
Field Scouting, Monitoring	1	Amount of Pesticide to Add to Tank	28
Economic Thresholds	2	Granular Applicator Calibration	28
Control Strategies	2	Review Questions	30
Cultural Control	2	CHAPTER 5: INSECT MANAGEMENT	33
Biological Control	3	Growth and Development	33
Chemical Control	5	Considerations for Pest Management	34
Review Questions	6	Insect Pests of Asparagus	34
CHAPTER 2: MINIMIZING PESTICIDE IMPACT ...	9	Asparagus beetles	34
State and Federal Laws	9	Asparagus miner	34
Guidelines for Selecting and Using Pesticides	9	Cutworms	35
Protecting Our Groundwater	10	Insect Pests of Carrots	35
Keeping Pesticides Out of Groundwater and		Aster leafhopper	35
Surface Water	10	Carrot weevil	35
Protecting Non-target Organisms	11	Insect Pests of Celery	36
Potential for Pesticide Resistance	12	Aster leafhopper and carrot weevil	36
The Development of Resistance	12	Green peach aphid and sunflower aphid	36
Resistance Management	13	Celery looper and cabbage looper	36
Notifying Neighbors	13	Tarnished plant bug	37
Review Questions	14	Variegated cutworm	37
CHAPTER 3: APPLICATION EQUIPMENT	17	Insect Pests of Cucurbits	38
Methods of Application	17	Aphids	38
Types of Sprayers	17	Cucumber beetles	38
Parts of a Sprayer	18	Squash bug	38
Tanks	18	Insect Pests of Cole Crops	39
Agitators	18	Imported cabbageworm	39
Pumps	18	Cabbage looper	40
Strainers	19	Diamondback moth	40
Hoses	19	Cabbage maggots	41
Pressure Regulators	19	Insect Pests of Corn (Sweet)	41
Pressure Gauge	19	Corn flea beetle	41
Nozzles	20	European corn borer	41
Operation and Maintenance of Sprayers	20	Corn earworm	42
Before Spraying	20	Fall armyworm	43
During Spraying	21	Insect Pests of Onions	43
After Spraying	21	Onion maggot	43
Granular Applications	21	Onion thrips	44
Field Operations	21	Insect Pests of Potatoes	44
Global Positioning System and		Colorado potato beetle	44
Geographical Information System	21	Potato leafhopper	45
Review Questions	22	Green peach aphid and potato aphid	45
CHAPTER 4: CALIBRATION		Insect Pests of Snap Beans	45
Introduction	25	Potato leafhoppers	45
Calibration of Sprayers	25	Tarnished plant bug	45
Variables that Determine the Spray Rate	25	European corn borer	46
		Insect Pests of Tomatoes	46
		Colorado potato beetle	46
		Tomato hornworm	46
		Tomato fruitworm	47

General Vegetable Insect Pests	47	Diseases of Corn	66
Seedcorn maggot	47	Common rust	66
Review Questions	48	Corn smut	66
CHAPTER 6: WEED MANAGEMENT	51	Stewart's wilt	67
Development Stages	51	Diseases of Cucurbits	67
Life Cycles of Weeds	51	Alternaria leaf spot	67
Common Weeds in Michigan	52	Mosaic viruses	68
Grass and Grasslike Weeds	52	Powdery mildew	68
Broadleaf Weeds	52	Phytophthora root, crown, and fruit rot	69
Weed Control	53	Diseases of Onions	69
Cultural Control	53	Purple blotch	69
Mechanical Control	53	Downy mildew	70
Chemical Control	53	Smut	70
Types of Herbicides	53	Botrytis leaf blight	71
Preplant Herbicide Soil Applications		Diseases of Potatoes	71
and Incorporation	53	Early blight	71
Preemergence Herbicide Applications	53	Late blight	72
Postemergence Herbicide Applications	54	Fusarium dry rot	73
Herbicide Carryover	54	Common scab	73
Herbicide Combinations	54	Black scurf/stem canker	74
Herbicide Additives (Adjuvants)	55	Diseases of Snap Beans	74
Herbicide Compatibility Problems	55	Fusarium root rot	74
Review Questions	55	White mold	74
CHAPTER 7: DISEASE MANAGEMENT	57	Halo blight	75
Introduction	57	Diseases of Tomatoes	75
Fungi	57	Early blight	75
Bacteria	58	Septoria leaf spot	76
Viruses	58	Anthracnose	76
Disease Triangle	58	Bacterial spot	77
Disease Cycle	58	Review Questions	78
Disease Management	60	CHAPTER 8: NEMATODE MANAGEMENT	81
Cultural Control	60	Introduction	81
Biological Control	60	Plant-parasitic Nematodes	82
Chemical Control	60	Nematodes of Importance in Vegetable Production	82
Diseases of Asparagus	60	Northern Root-knot Nematode	82
Rust	60	Lesion Nematode	83
Purple spot	61	Cyst Nematode	83
Fusarium wilt and crown rot	61	Stem and Bulb Nematode	85
Diseases of Carrots	61	Common Needle Nematode	85
Aster yellows	61	Pin Nematode	86
Alternaria leaf spot	62	Sampling Nematode Populations	86
Cercospora leaf spot	62	Management of Plant-parasitic Nematodes	86
Damping off	63	Review Questions	87
Diseases of Celery	63	APPENDIX A: Answers to Review Questions ..	89
Aster yellows	63	APPENDIX B: Conversion Tables	91
Septoria leaf blight	63	APPENDIX C: Glossary	92
Bacterial leaf blight	63	APPENDIX D: Selected Bibliography	99
Fusarium yellows	64	Pesticide Emergency Information	101
Diseases of Cole Crops	64	APPENDIX E: Crop-destroying Pests	103
Black leg	64		
Black rot	64		
Alternaria leaf spot	65		
Clubroot	65		
Downy mildew	65		

INTRODUCTION

How to Use This Manual

This manual contains the information needed to become a certified commercial applicator in Category 1B, Vegetables. This manual is intended for use in combination with the *Pesticide Applicator Core Training Manual* (Extension bulletin E-2195), available through the Michigan State University Bulletin Office. However, this manual would also be useful to anyone interested in learning more about vegetable pest management.

Category 1B, Vegetables, covers the management and control of common pests in asparagus, carrots, celery, cucurbits, cole crops, onions, potatoes, snap beans, sweet corn and tomatoes. The manual presents basic scientific information on pest life cycles and emphasizes protecting non-target organisms and preventing the development of resistance in pests.

The Category 1B certification exam is based on information found in this booklet. Each chapter begins with a set of learning objectives that help you focus on what you should understand from each chapter. The table of contents helps you identify important topics and understand how they relate to one another through the organization

of headings and subheadings. As you prepare for the exam, read each chapter and answer the review questions. These questions are not on the certification exam, but are provided to help you prepare for the exam. Questions on the exam will pertain directly to the learning objectives.

The appendices and glossary, including an answer key (Appendix A), at the end of this manual provide supplemental information that will help you understand the topics covered in the chapters. Terms throughout the manual text that are bold or italicized can also be found in the glossary.

This certification manual benefits the applicator and the general public. By learning how to handle pesticides correctly, applicators can protect themselves, others, and the environment from pesticide misuse. For more specific information on how to become a certified applicator in Michigan, refer to the beginning of the core manual (E-2195) or the Michigan Department of Agriculture's Web site, <<http://www.mda.state.mi.us>>, or call the MDA at 1-800-292-3939.
