

## **Southwest Michigan Field Crops Update**

**November 13, 2025**

Here are updates from the MSU Extension Field Crops team in Southwest Michigan. If you have any items you would like me to include in future email updates - whether events you want others to know about or topics you would like to have addressed - please send an email or call the St. Joseph County Extension office.

**Contents:**

- Announcements
- 2025 Season in Review
- [Weather Update](#)
- [Calendar](#)
- [MSU Extension Digest Briefs](#)

## **“Farming Funnies”**

We can all use an occasional laugh to make it through the long nights and short days of winter. If you have a funny story or picture to share, feel free to send it my way!

**WE NEED TWO RECRUITS TO STAY BACK AND HOLD OUR POSITION.**

**WE VOLUNTEER, KERNEL!**

**IT WILL BE BRUTAL, THANKLESS WORK  
IN TOUGH CONDITIONS, BUT STAND  
STRONG, WE'RE COUNTING ON YOU.**

## FREE Fumigation Webinar Dec 2

Join us virtually for a two-hour webinar (and 2 fumigation credits) on respirators and pests targeted by grain bin and soil fumigation! The webinar will be Dec 2 from 6 to 8 pm. Register here: <https://events.anr.msu.edu/Fumigation2025/>

## Sign up now for the FREE Beyond the Bin Grain Marketing Workshop Dec 4 in Hartford

The workshop is free to attend, but **please pre-register** so we have accurate counts for lunch and materials: <https://events.anr.msu.edu/GrainMarketingWorkshop2025/>

### BEYOND THE BIN GRAIN MARKETING WORKSHOP

#### Topics covered

- Cost of production
- Marketing
- Marketing decision process
- Contracts
- Return on investment of crop protection products

1 RUP credit has been requested

**December 4**

9:00 am - 2:00 pm,  
lunch provided

#### LOCATION

Van Buren MSUE Office  
57418 CR 681, Suite A,  
Hartford, MI 49057

**MICHIGAN STATE**  
UNIVERSITY | Extension

## How does irrigation affect yield under drought conditions?

This year, Michigan has seen wide variability in precipitation; some areas had enough rain, while others have struggled with drought. To better understand how irrigation affects yield under these conditions, the [Michigan State University Extension irrigation team](#) is looking for cooperators willing to share yield data from irrigated fields and non-irrigated areas.

Participants will need to provide:

- Yield data for both irrigated and non-irrigated areas, such as dry corners.
- Estimates of rainfall amounts and irrigation applied.

This information will be used strictly for research purposes. If you'd like to participate or get more information, please fill out this [form](#) or contact [Angie Gradiz](#).

## Integrated Crop and Pest Management Update for Agribusiness Dec 19

This December, embark on a quest to change your clients' field crops fate. Hear from MSU experts on the latest research-based pest, disease, and fertility management recommendations. **5 RUP and 5.5 CCA credits** have been requested. Watch for an article with all the details soon!

**ADVENTURE AWAITS...**

**AT THE MSU CROP & PEST MGMT UPDATE FOR AGRIBUSINESS**

Join us December 19 | 8:30 am to 4 pm

## Save the Date! SW MI Crop and Pest Management Update Jan 22 in Dowagiac

The annual regional Crop and Pest Management Update will be held Jan 22, 2026. More details to come.

## Save the Date! Soil Fertility Workshop 2 on Feb 5 in St. Johns

This workshop goes more in depth on soil fertility and nutrient management. It is intended for people who already understand the basics. Key topics include nitrogen, nutrient interactions, micronutrients, sulfur, economics of nitrogen, and a Q&A. Read more about it in [this article](#), or [register online here](#).

## 2025 Season in Review

“It’s important to keep good records of the different challenges and opportunities from each growing season. Records serve as a reference for future seasons and can help you learn from past mistakes (or wins), adapt and respond to future challenges. This article provides an overview of findings in southwest Michigan. Overall, 2025 had few pest challenges and mostly weather-related challenges. In many cases, you may have had a different experience, pressure or timing than those mentioned below. If so, note that and keep it in your records to help you respond to future crop challenges.

### Weather

The 2025 season was considerably warmer and drier than normal. Potatoes started planting in mid-March. Early-season cool temperatures benefited potatoes and winter wheat but delayed corn and soybean planting. Corn particularly was stunted, yellow and delayed from the early-season cool temperatures and cloudy days exacerbated by smoke...” **Read the full article: [The 2025 southwest Michigan field crops season in review](#).**

# Weather Update

Snow fell over the past weekend and even stuck around for a couple days. It has since mostly melted off, and warm temperatures up to around 60F are expected for Friday and Saturday. After that, temperatures will drop again, and a significant rainfall is forecast for next Thursday.

Ten-day weather forecast for Kalamazoo according to [wunderground.com](https://www.wunderground.com).

The 6-10 day (Nov 18-22, top) and 8-14 day (Nov 20-26, bottom) outlooks for temperature (left) and precipitation (right).

## Calendar

[Note: Titles are clickable links to online content when highlighted and underlined.]

**Nov 18** [\*\*Farm Accounting Software Options Workshop\*\*](#). 3-6 pm OR 6-9 pm. AgroLiquid, 3055 W. M-21, St. Johns. Managing farm finances can be challenging. This workshop can help you select the right accounting software for your farm. Learn more about some of the popular software packages, and try them for yourself. FREE. Please pre-register.
